Low noise model

The Hurricane Leaf and Litter Vacuum Sweeper

The Hurricane leaf and litter sweeper range solves the problem of collecting litter and leaves in public and private areas. Four models are in the range; an entry level push along model, powered driven and low-noise, driven walk-behind sweepers and the truck loader.

High Performance - Low Noise

Powered by Honda engines the Hurricane is a vacuum collector for use on lawns, pavements and in outdoor areas. An advanced fan and turbine system shifts over 2500 cubic metres of air per hour producing a vacuum powerful enough to collect the most compacted, wet litter and leaves and of course discarded cans and bottles. Despite the power of the vacuum the Hurricane is quieter than competitive machines due to its low-noise design. For areas such as schools and hospitals a noise sensitive model that sounds 50% quieter is available.

MODELS:	ES-330B-01	ES-400HOPRO-06	ES-400PIA-06	LG-900HO-13
